Sucka Signs are based on LED light sheet, manufactured from clear 6mm cast acrylic, laser etched with our patent dot matrix, creating the brightest pockets in Europe.

Each Sucka Sign and poster pocket has two rows of super bright, cool white LED's embedded in the long edge of the panel. All of our standard Sucka Signs are single sided, with a reflector panel to the back, and can be used in either portrait or landscape. The clear face panel of the sign, which holds the poster in place is fixed to the acrylic panel with permanent double sided tape. The opening section is held in place using magnets, with the border and sucker finished in black. Supplied with a plug-in driver and 1.85m of cable.

The panel is held in place using specialist suckers affixed to glass surfaces or alternatively can be surface mounted using sign stand-off fittings or split baton for the larger sizes.

Also available surface mounted.

## STANDARD SUCKA SIGN PRICE LIST

| IMAGE SIZE | OVERALL SIZE | RUNNING COST 24 HOURS | PANEL COST | STANDARD PRINT COST | 5 YEAR LIFE SPAN |
|---|---|---|---|---|---|
| A3 - 297 x 420mm | 304 x 507mm | 15w / 6p | £176.00 | £16.66 | £17.84 |

- Bulk order pricing is available upon request.
- Trade order pricing is available upon request.

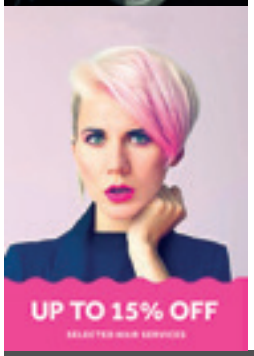
# USEFUL INFORMATION



This is a completely new product. It provides a much simpler solution for martketing & the alternative methods are considerably more expensive. So Sucka Signs big USP is it's cost, plus the poster library makes constant marketing easy and cheap.

LED light pockets on cables

Floor standing LED light pockets

We must have their email address in order to send them future ideas and they can give us ideas, which we can use for other people in the same sector.
We want Sucka Signs to be a national product - even international.

I am thinking about a franchise method.

Trade will be sold through our other company called Cortec i.e. to distributors.

If you need anything changing we can do that for you i.e. order form. This is my 4th version and probably can be improved.
The library has to grow – the images can be changed to suit the clients copy. This will be done within reason.
New ideas and designs will be added every month to the library to give greater choice as well as additional categories.
Postage/packing £6.00.

**Design Service:**
We provide a complete bespoke design service for tailor made requirements. Please note some images may require license fees from the owner of the copyright. Artwork cost £50.00 + VAT.
Our image fee – we have added £10.00 to each poster to cover the cost of the library and cover changes done for clients.

If the images are supplied by the client they must be print ready – see back of library leaflet for information.
Paper printed images are very dull, we will do a photo shoot with a poster image up against a duratrans.

**The Image Library:**
I am of the opinion that it is a very important service to both us and the client. We are going to charge £120.00 +VAT per year for membership and we will be sending them ideas and reminders for events etc.
If they just want the image for their printer to print it is £10.00 – No alterations.

**Bulk Orders:**
This will be on a case by case enquiry. I think over 50 is a big order. We could use similar options to close.

**To help close an order:**
This is for small and medium size orders.

1. Double sided doesn't cost to produce than a standard pocket, but don't forget it will require and additional poster. But if we can get away with it charge +10%
2. From our experience the pockets last 5-10 years, so you can offer additional warranty (don't call it guarantee there is a difference), suggest one year. You have to record this so we know.
3. The image library – it is our intension to charge £120.00 Per year. So we can offer one additional year for free.
4. If we have to give away standard poster – this costs the company: A3 - £3.40, A2 - £6.08, A1 - £12.12 and A0 - £21.24.

**Acrylic Facts - Myths Busted**

**Useful Fact No. 1**

Is all acrylic the same?

Simple answer – no!
Brands vary in quality and in additional there are different types of acrylic.
For instance there is cast acrylic and extruded acrylic. These two whilst visually the same to the untrained eye are made using different processes.
Cast due to its manufacturing process is generally more expensive and has a higher optical quality than extruded.
Neither should ever be called plastic or pvc. These are different again!
We only ever use perspex cast acrylic in our pockets.

**Useful Fact No. 2**

How do you keep it clean?

You can clean acrylic with a purchased anti-static cleaning spray.

**Useful Fact No. 3**

How do I deal with static?

Acrylic is very static, however if you are on a tight budget you do not need to buy an expensive anti-static cleaner.
You can use a mild solution of washing up liquid and water. Put the solution into a clean unused plant sprayer for easy use.
Spray on and wipe off in one direction – never rub, using a soft lint free cloth.
For extra sparkle add just 1 small drop of vinegar, it is that simple.
When cleaning your acrylic simply draw the soft lint free cloth in one direction across the whole frame as you finish. This will de-staticise the acrylic.

**Useful Fact No. 4**

Does acrylic scratch?

Of course it does! But it won't if you treat it with care.

**Useful Fact No. 5**

How do I avoid scratches?

Never lean/lie your acrylic goods against a wall or surface face down.
Never use a fibrous cloth, such as a duster as this will cause a patina over time.
Never use it as furniture unless it has been specially coated or you don't want to put anything on it.
Never clean your acrylic goods whilst wearing rings or metal watches.
Never use abrasive products on your acrylic goods.

We hope this is all really useful!

We provide a full bespoke design service for all of our poster sizes, please call for further information & pricing.
Full access to our Image Library is available for a cost of €120+VAT per year.

## Supplying Artwork

**What files can I upload?**

We recommend the following file types:

Press ready PDF, High quality PDF, PDF/X, EPS, TIFF or JPEG

For the best results, produce your artwork at full print size to the dimensions you require, and ensure all fonts and imagery are outlined and embedded.

**My file is extremely large, what should I do?**

Produce or save your artwork at half size (50%) which will reduce the size of the file and we will upscale it when we receive it. Please note, this may reduce the final print quality of your artwork.
Alternatively, send your artwork to *studio@vis-com.net* via WeTransfer or Dropbox.

**I don't have artwork, can you design it for me?**

Absolutely. Whether you are a small business, a well-known brand or an individual celebrating a birthday, our in-house design team can exceed your expectations. Simply call our design studio before creating your order and provide them with a detailed brief.
Proofs will be sent to you via email for your approval before we start any printing.

**What colour format does my artwork need to be?**

As we print in CMYK (Cyan, Magenta, Yellow, Black) ideally all artwork should be supplied this way. If you are unable to do this we can do it for you.
Please be aware that files converted from RGB to CMYK may alter the colour composition significantly.

When working in CMYK for printed media, a mix of all colours (75/68/67/90) produces the blackest black you can get.
Although 0/0/0/100 (100% Key) may appear black on your RGB screen, it is not the best black you can achieve and may appear washed out or even grey.

Please use the image shown here as a reference:

| | |
|---|---|
| C 75 \| M 68 \| Y 67 \| K 90<br>True Black | C 0 \| M 0 \| Y 0 \| K 100<br>100% Key |

Whilst every effort is made to ensure colours match the files provided, different materials and light sources may produce slightly different colours once printed due to finishes, textures and pocket illumination values.

**Do you need bleed and crop marks?**

No, just your artwork to size is fine, if the artwork doesn't have them. We'll make the final preparations to your file here.

**What DPI must my artwork be?**

For the best results, we recommend 300dpi or higher.

**IMPORTANT PLEASE NOTE:**

The images used in our Sucka Signs are specifically formatted to work with our super bright pockets and are overlaminated for longevity and to prevent the ink from softening in extreme heat which could damage the sign's acrylic face.
If the posters used in Sucka Signs have not been over laminated and ink residue has been deposited on the clear acrylic face, then we cannot cover this within our warranty.

**TERMS & CONDITIONS**

- 48 Hour Service - subject to when order is placed.
- Cut off time for orders is 1pm.
- All artwork supplied must be print ready (unless design service is being used).
- Delivery is charged at current post office charges.
- VAT is applicable.

# DELIVERY VEHICLE SIGNAGE

# WHY?

Because of the explosion in delivery companies and systems on the streets of our towns & cities throughout the country providing door to door deliveries.

IT ONLY takes three people a minute subconsciously viewing a brand to create over 500,000 views in a year, multiply this by the number of vehicles carrying your brand and...

## YOU HAVE THE CHEAPEST VIEW PER POUND

which works out considerably more cost effective than TV advertising.

***Example:*** A standard 3 panel specification is approximately £150.
Yearly cost £50 Subconscious views of 500,000 cost per view of 0.0001p
Figures are based on your brand being visible for 8 hours a day/night.

# THAT'S WHY

**MADE IN BRITAIN**

**SUCKA SIGN BACK WINDOW**

Providing a new concept in vehicle advertising for 100s of different types of companies **from delivery vehicles to building services to fast food, the opportunities are endless.**
The panels are fixed to the glass using our unique Sucka system, plug in to the cigarette socket and the panel lights up, so every vehicle from car to van can become a marketing opportunity.

**FAST FACTS**

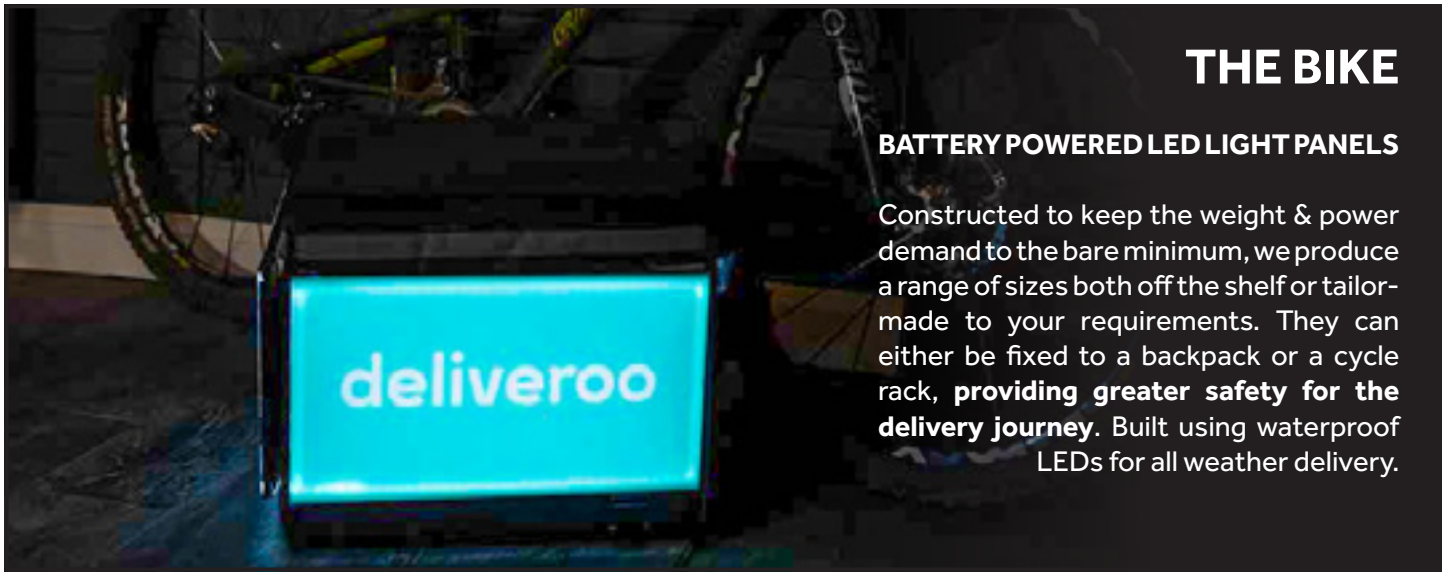
- Easy installation
- Changeable graphics option available
- Battery powered version available
- Minimal power usage
- Super bright version available

**STANDARD INTERNAL SIZES**

125mm x 250mm
125mm x 500mm
150mm x 750mm
150mm x 1000mm
250mm x 750mm
250mm x 1000mm
Bespoke Size

The easy to install panels can also be stuck to the glass in your shop or office, for larger installations see Sucka Signs.

# DELIVERY VEHICLE SIGNAGE



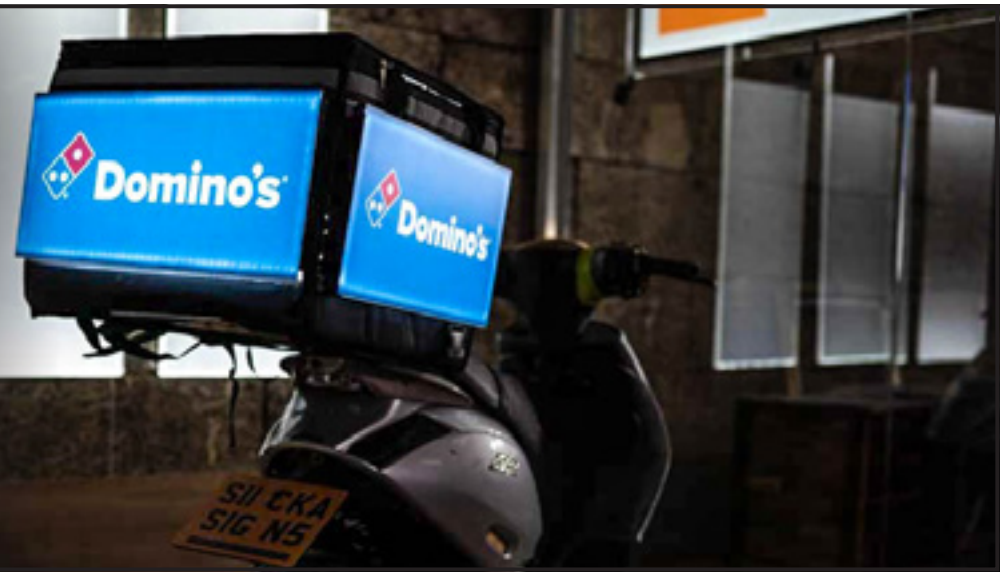
## THE BIKE

**BATTERY POWERED LED LIGHT PANELS**

Constructed to keep the weight & power demand to the bare minimum, we produce a range of sizes both off the shelf or tailor-made to your requirements. They can either be fixed to a backpack or a cycle rack, **providing greater safety for the delivery journey**. Built using waterproof LEDs for all weather delivery.

## THE SCOOTER

We have developed a standard range of LED light panels to illuminate your brand, powered by a separate battery or connected to the scooter or motorcycle electrical system. **Providing greater street presence and an increased safety for the rider**.
All this as well as being built to survive the British weather conditions.



**LEAGAL INFORMATION - WHAT THE HIGHWAY CODE SAYS:**

Information is found in "*The general rules, techniques and advice for all drivers & riders. Section 4. Lighting requirements (113 to 116) - No. 114.*"
You must not use any lights in any way which would dazzle or cause discomfort to other road users, including pedestrians, cyclists and horse riders.

**The Road Vehicles Lighting Regulations 1989 No. 1796 - Part II Regulations Governing The Fitting Of Lamps, Reflectors, Rear Markings And Devices.**
(2) No vehicle shall be fitted with a lamp which is capable of showing any light to the rear, other than a red light.

**MAKE YOUR BRAND SHINE ON THE STREETS**

# LED MAGNETIC WALL POCKETS

We have developed a range of wall mounted **easy use pockets**, starting at 200mm x 500mm up to a **giant 3000mm x 1200mm**.
The pockets are only 15mm thick right up to the maximum size.

The focus being on ease of use, a simple to change image to give you flexibility and continuous interest in your message.

With a super bright, even light across the whole pocket we can achieve photo realistic images using Duratrans, a printing process developed by Kodak.

Cortec manufactures these unique products in the UK and we guarantee your peace of mind with a 3 year warranty on all sizes. Quantity and Customer Loyalty discounts also available.

| 400 x 2000mm | £284.80 |
| 400 x 2250mm | £340.85 |
| 400 x 2500mm | £355.64 |
| 400 x 2750mm | £370.29 |
| 400 x 3000mm | £384.83 |

**Fitting Instructions:**

It is recommended pockets are fitted to the wall using aluminium split baton. Acrylic has a high expansion rate but using aluminium split batons allows the panel to expand minimising warping.
The weight should be carried by the to baton rail with bottom rail being set lower to allow for vertical expansion of the panel.

**Please Note:** The bottom split baton rail is not to be used to take weight, its purpose is just to hold the panel against the wall.
